

SCHOTT ARTISTA® – Extra-clear decorative glass

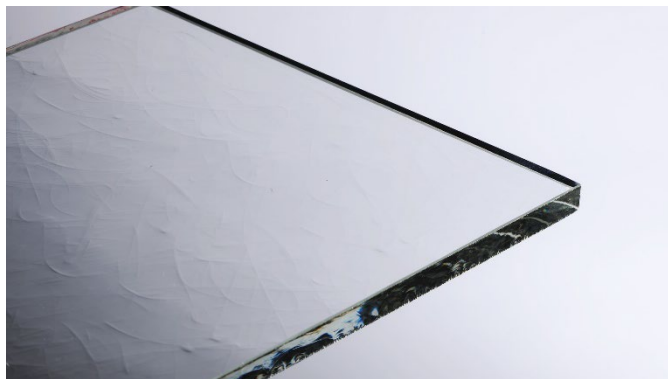

Colorless, extra-clear & timeless

SCHOTT ARTISTA® extra-clear decorative glass is a high-quality flat glass with an exceptionally low iron content. The resulting crystal-like clarity of the glass allows a particularly transparent view into the interior of the room and makes the space appear larger. The subtle structured pattern brings life and sparkle to the room.

Many applications

SCHOTT ARTISTA® can be used in a variety of different applications, both indoors and outdoors: in cabinetry, as a shower door partition or as a separation wall in the living or office area. SCHOTT ARTISTA® also finds its areas of application in the field of art and design: for fusing, for art installations or for lighting applications such as in a chandelier.

Product benefits

- Glass with extra-clear properties
- Structured on one side
- Available for fusing application
- Suited for stained glass applications
- Has the European Technical Assessment ETA-12/0159 from the German Institute for Construction Technology
- Wide range of glass manufacturing options (e.g. toughened safety glass, laminated glass or insulating glass)
