

A romantic couple is shown in profile, smiling and looking at each other in a dark setting. The background is filled with warm, out-of-focus bokeh lights. In the lower-left foreground, there is a bright, glowing fire. The overall mood is intimate and passionate.

Wild fire,
dancing flames,
irresistible passion.

Tamed by SCHOTT ROBAX®.

Fire-viewing panels

Life. In front.

Safety is our utmost priority.

So you will never have to worry about your fiery passion.

100% confidence and safety for
worry-free pleasure at the fireplace.

Here is proof:

Certification of material properties
impact and thermal resistance*

*Manufacturer: SCHOTT AG, Mainz / Applicant: SCHOTT North America

Moments
ablaze with vitality.
For decades.

To bring evenings at
the fireside to maximum
temperature.

ROBAX[®] withstands appreciable
temperatures and thermal shocks.

Short term up to 760° C, long term up to 560° C

So light your fire
and allow yourself
to be swept away
in confidence.

Engineered in Germany.
