SCHOTT Positive List of Optical Filter Glasses

SCHOTT self-commitment to announce glass discontinuation years in advance.
Version January 2021, effective from 1.1.2021

Our portfolio glasses are melted regularly for a long-term period

The following glasses will remain in our portfolio for at least the next 5 years from the effective date. This list is subject to annual updates*.

Any glass removed from this list in an update will then be scheduled as an "Inquiry Glass" for 5 years before it finally becomes an "Obsolete Glass" (see following sections).

This procedure will provide confidence and trust in the long-term supply of our portfolio.

Table 1: SCHOTT portfolio glasses: long-term availability

The stock of our portfolio glasses is replenished on a regular basis, however, the glass types are not available at all times in every format.

For information about available geometries of matte plates, polished filters, or coated filters, please contact us.

Glasses that are scheduled to become an inquiry glass

The following glass types will become an inquiry glass on the date designated below. These glasses are handled in the same way as portfolio glasses and they are melted regularly until the designated date. From that day onwards they are still available as such, but new melts are made on customer demand only.

Glass type	will become an inquiry glass by
BG66HS	1.1.2024
S8809	1.1.2025
Grey25	1.1.2026
Grey50	1.1.2026

Table 2: Portfolio glasses which are scheduled to become an inquiry glass

Inquiry glasses are produced on special request

Some optical filter glass types are low in demand and our stock will not be replenished on a regular basis.

The following inquiry glasses will be manufactured on customer demand only.

We will gladly discuss minimum purchase quantities, specifications and costs with you.

Table 3: Inquiry glasses

Obsolete glass types

Inquiry glass types which have not been ordered in the past 5 years will become obsolete.

Any glass which cannot be melted due to technical or legal reasons will become obsolete as well. The following glass types are obsolete:

FG3, M-UG2, M-UG6, S8005, S4020, UVILEX, URO H9

*Please note

This list is updated every year.

The filter glasses are melted in campaigns. The time interval between the melts varies for each glass.

Therefore, the short term availability is subject to prior sale.
